

Keyword Lexicon

Saintiment research · working draft

Generative AI and deskilling in architectural discourse.

Seed terms for team review — not permission to collect.

Source: research/keywords-search-storage.md · 2026-08-29

Essential terms are highlighted.

Categories

Two search layers: A discovers architecture + GenAI; B filters skill terms inside that set.

Code	Category	Layer / use
A	Architecture / built environment	Layer A — discovery context
G	Generative AI & tools	Layer A — GenAI cues
S	Skill, labour, deskilling	Layer B — profession & labour
K	Soft skills & judgment	Layer B — creativity & judgment
H	Hard / technical / environmental	Layer B — technical competence
R	Representation & digital practice	Layer B — drawing & digital
W	Stakeholder / role vocabulary	RQ4 coding & retrieval
X	Exclusion / false-positive control	Mark as exclude, do not silently drop

Search rules

1. Require architectural context — never search GenAI alone.
2. Layer A must run without Layer B (neutral discovery).
3. Do not search sentiment words (excited, hype, threat...).
4. Record the query string with every captured item.
5. Treat EN, FA, and DE as separate language passes.
6. Exclude IT/software-architecture hits by documented rules.

Query logic: (architecture context) AND (GenAI cue) AND optional (skill cue) NOT (exclusion)

Query version 1 (pilot)

Planning strings — adapt operators to the permitted interface.

A1 — neutral discovery

(architect OR architectural OR "architecture firm" OR "architecture student" OR archviz)

AND ("generative AI" OR GenAI OR Midjourney OR "AI rendering" OR ChatGPT OR "DALL-E" OR "Stable Diffusion")

NOT ("software architect" OR "solutions architect" OR "enterprise architecture" OR "cloud architect")

B1 — deskilling inside topic

A1 AND (deskilling OR de-skilling OR skill loss OR replace architects OR upskilling OR reskilling)

Scope defaults

English first · from 2022-11-30 · one permitted source per batch · pilot 80–120 Layer-A hits

Layer A — Architecture context

Category A · EN

Require architectural context. Pair every term with a GenAI cue (Layer G).

51 terms · 7 essential (highlighted)

architect **architects** **architectural** architectural design **architectural practice**

architectural education architectural discourse **architecture firm** architecture studio

architecture school **architecture student** architecture office licensed architect

registered architect architect of record junior architect intern architect

associate architect principal architect design principal starchitect AIA RIBA

RAIA / Australian Institute of Architects NAAB built environment building design

urban design urbanism landscape architecture interior architecture

schematic design design development construction documentation

construction administration design studio studio culture design crit design jury

Part 1 architect Part 2 architect Part 3 architect architectural visualization **archviz**

architectural rendering facade / façade building envelope massing floor plan

concept design conceptual design

Layer A — Generative AI & named tools

Category G · EN

Neutral discovery set. generative design = older CAD sense; tag separately from GenAI.

51 terms · 10 essential (highlighted)

Layer B — Deskillling & labour

Category S · EN

Use only with Layer A, or as a second filter on architecture + GenAI hits.

39 terms · 8 essential (highlighted)

- deskilling**
- de-skilling / de skilling**
- skill loss**
- skill erosion
- skill atrophy
- losing skills
- lost skills
- dumbing down
- replace architects**
- replacing architects
- architect replacement
- automate architecture
- automated design
- automation of design
- job displacement**
- job loss
- junior pipeline
- training pipeline
- apprenticeship
- fewer juniors
- craft
- craftsmanship
- tacit knowledge
- professional expertise
- commoditization / commodification
- obsolescence
- obsolete skills
- reskilling**
- upskilling**
- skill shift
- skill transformation
- new skills
- future of the profession**
- future of architecture
- future of architects
- AI will replace
- human in the loop
- cheaper design
- faster cheaper

Layer B — Soft skills & judgment

Category K · EN

RQ2a / RQ2b. Always combine with Layer A + G.

32 terms · 7 essential (highlighted)

soft skills	creativity	creative thinking	design thinking	originality	authorship
authorial	imagination	artistic	aesthetic	taste	conceptual thinking
idea generation	storytelling	narrative	client communication	presentation skills	
collaboration	empathy	judgment / judgement		professional judgment	
design judgment	critical thinking		critical judgment	decision-making	
design intuition	intuition	expertise	cognitive skills	spatial reasoning	
discernment	problem-solving				

Layer B — Hard / technical / environmental

Category H · EN

RQ3a. Environmental and regulatory competence.

30 terms · 6 essential (highlighted)

hard skills	technical skills	technical knowledge	environmental design
environmental performance	building performance	building science	
energy modeling / modelling	daylighting	thermal comfort	passive design
sustainability	carbon	life-cycle / LCA	building codes
zoning	code compliance	fire safety	accessibility
		structural design	MEP
detailing	construction detailing	construction knowledge	buildability
materials knowledge	specification / specifications	technical drawing	working drawings

Layer B — Representation & digital practice

Category R · EN

RQ3b. Drawing, BIM, rendering, computational workflows.

34 terms · 7 essential (highlighted)

representation architectural representation drawing **hand drawing**

drafting / draughting CAD **BIM** **Revit** AutoCAD Rhino / Rhinoceros

Grasshopper SketchUp ArchiCAD Vectorworks Lumion Enscape V-Ray

Twinmotion Unreal Engine **rendering** **visualization / visualisation**

3D modeling / modelling **computational design** **parametric design** algorithmic design

digital skills scripting visual programming digital fabrication Photoshop

post-production collage diagram section / elevation / perspective

Stakeholder vocabulary

Category W · EN

For RQ4. Infer role from self-identification in text, not from photos.

25 terms · 5 essential (highlighted)

practitioner	practicing / practising architect	professional practice	academic
professor	lecturer	educator	faculty
		architecture researcher	student
architecture student	graduate student	intern	year-out
		industry leader	
thought leader	principal	partner	director
		practice director	firm owner
Dean / head of school	developer	client	critic

Exclusion & control terms

Category X · EN

Log matches; mark relevance_status: exclude. Do not silently drop from raw batch.

15 terms · 5 essential (highlighted)

software architect

solutions architect / solution architect

enterprise architect / enterprise architecture

cloud architect

data architect

information architect

security architect

systems architect

IT architect

TOGAF / Zachman

computer architecture / CPU architecture / chip architecture

instruction set

microservices

naval architect

GitHub Copilot

Persian seed terms

Category FA · FA

Optional second pass. Do not mix with English without a language field.

48 terms · 12 essential (highlighted)

A

/

/ BIM

/

German seed terms

Category DE · DE

Optional second pass. Not selected for first collection.

21 terms · 8 essential (highlighted)

Architektur	Architekt / Architektin / Architekten		Architekturbüro	Architekturstudium
generative KI	Künstliche Intelligenz	KI-generiert	Midjourney	Dequalifizierung
Entqualifizierung	Kompetenzverlust	Kreativität	Design Thinking	Urteilsvermögen
fachliches Urteil	technische Fähigkeiten	umweltgerechtes Entwerfen	Darstellung	
Visualisierung	Handzeichnung	BIM		

Hashtags (optional)

High noise — always combine with a human relevance pass.
